Test plan: KR Agency

Gennadiy Furduy • 1601321027 • 16.10.2019

Overview

We will use manual testing for our project.

In the future, if project size will grows, we will implement automation testing.

Testing goals

The application should implement functions described as acceptance criteria

The application should look like it prototype (mockup)

Function for testing

- User can choose victim type

- User can choose performer

- User can see successful chance

- User can see price

- System calculate order price at right way

- System add order to DB

- System show all orders for users with administrator role
